13.1.1 Bachelor of Science in Health Care Administration

Concentration in Emergency Medical Services Management (added 03.11.2013)

Bachelor of Science in Health Care Administration

Total Program Requirements	120
General Studies Requirements	36
General Studies Electives	24
Major Requirements.....	36
Major Electives.....	24

The Bachelor of Science (BS) in Health Care Administration provides students with a foundation of knowledge regarding the health care industry. The program prepares students to apply knowledge in a professionally, competent manner to advance in the field of health care as a leader or administrator. Emphasis is placed on building strong communication skills and organizational competence in managing and developing professional standards, procedures, and policies for various institutional health care activities. These leaders should be well organized and attentive to detail. The BS in Health Care Administration does not offer a clinical or infield experience component. Its purpose is to provide a broad educational background to those already working in the health care field.

1. Analyze and select strategic planning processes which are effective in health care organizations and business environments.
2. Develop strategies for a competitive advantage in working with health care markets and critical thinking in relation to current trends in the health care industry.
3. Demonstrate strategic leadership skills in managing special operations and emergencies in health care.
4. Explain the connection between bioethics and effective delivery of health care services.
5. Demonstrate how to plan for disasters and structural failures in a health care organizational setting.
6. Plan, design, and evaluate training programs and performance improvement programs in a medical organization.
7. Evaluate key factors affecting the financial aspects of providing health care in today's dynamic and competitive environment.
8. Investigate the need for and appropriateness of research methodologies in the health care environment.
9. Apply measures of income and expense, working capital, and investments in calculating facility performance, making business decisions and budgeting.
10. Discuss why the legal profession has such important connections to health care delivery.
11. Evaluate important relationships between business ethics and medical business operations.
12. Discuss and explain the importance of "work ethic" and discuss why professionalism is so important in health care.

General Studies Requirements	36
Course Title	Credit Hours
