The Wills, Trusts & Estates Specialist

The intergenerational transfer of wealth is controlled by both statutory and common law principles applicable to a particular jurisdiction. Competing views of the individual's freedom of disposition and state power both to channel and to tax property have led to an interesting and complex array of legal devices and institutions that govern the proper way to gift certain types of property, trusts and other instruments of ownership. From statutory intestacy and elective share provisions, wills, and trusts to planning for incapacity, future interests in property, powers of appointment, life insurance, and introductory aspects of trust and estate administration, this course examines the everyday use of laws that govern how these instruments can be passed on from generation to generation as intended by the original or subsequent owners.

The Wills, Trusts & Estates Specialist Program

This program explores the ins and outs of the legal and ethical requirements necessary to develop and administer an estate plan. Students will be introduced to highly-specialized legal vocabulary pertaining to these particular legal fields, as well as relevant substantive and procedural law that govern wills, trusts and estates. For those students looking toward law school or who are interested in the paralegal profession, this program offers an incredibly useful and realistic look into the actual work that lawyers and legal professionals do every day. As part of this course, students will produce an estate planning and estate administration portfolio of relevant documents that thoroughly covers the wills, trusts, and estates legal specialty.
